MOSS MOTORS' CUSTOMER LOYALTY PROGRAM

Tired of all that hunting around for the best prices, only to end up shorted in service or quality? Wouldn't it be grand to get the best prices, service and quality everyday?

For the serious Classic British Car Enthusiast and Restorer, we introduce the Moss Customer Loyalty Program.

An order for $1,500 or more of Classic British Parts enrolls you in the program. You will receive a 12% discount on the initial order and on Classic British parts for 24 months.* Plus you will receive special e-mail sales and close out announcements all specially tailored for you.

We value your experience and commitment to Classic British Cars and will give any technical assistance you need a high priority. In addition, an assigned sales representative will ensure you get personal service.

Getting enrolled is easy. Just place an order for Classic British parts of more than $1,500 (at regular retail price). Let your sales person know that you wish to enroll, or you can add a comment to your web order.

From that point you will receive a 12% discount or promotional price (whichever is lower) for 24 months on all Classic British Car parts.*

*Discount only applies to retail Classic British parts at regular list price and does not apply to promotional items, superchargers, E.F.I. kits, 5-speed conversions or body tubs. During sale promotions, you will receive the lowest price possible on your items - which might be either the advertised sale price or your special Customer Loyalty Program discount. Qualifying order amount is based on order total before any discounts are applied. This offer is limited to Moss Motors Classic British parts and is not applicable to some general items or BMW Mini products.

Warranty Extended to 24 Months!

24 MONTH WARRANTY
ON ALL CLASSIC BRITISH PARTS.
LONGEST WARRANTY IN THE BUSINESS.
SEE BACK COVER FOR DETAILS.

All Classic British products including superchargers, supercharger components and hardware are warranted to be free from defects in material and workmanship for 24 months from date of invoice. Moss Motors, Ltd. will, at its discretion, repair or replace any part that fails in service within the warranty period. This warranty does not cover labor, failure of related components, normal wear of brake or clutch components or failure resulting from alteration, misuse, accidental damage, faulty installation or faulty repair. Warranty requests should be submitted to our sales department and must be supported by the original Moss Motors, Ltd. invoice and documentation of the failure.

See website for latest up to date information and details.

ON THE COVER: Moss Motors would like to sincerely thank Dave Wellwood for bringing his 1987 XJ6 to our cover shoot at the Bridlewood Winery in the Santa Ynez Valley.

Working on automobiles is inherently dangerous. Moss Motors, Ltd. is not liable for injury or damage due to incorrect installation or use of their products. All products are sold with the understanding that the safe and proper installation and use of the products is the customer's responsibility. Follow factory workshop manual procedures and instructions, but use current shop safety standards and common sense. Some tasks will require professional advice or services which Moss Motors cannot provide.

Moss Motors, Ltd.

Thank you for shopping with Moss. We're a company run by, and for, automotive enthusiasts. We hope you like our unique "one catalog per car" publishing style. Nothing is more frustrating than finding a great product, only to learn in the fine print, it's in the catalog, but they don't make it for your specific brand or model of car. This catalog is intended for your Jaguar, first and foremost.

In recent years, there has been a great deal of consolidation in our industry. Some well established names have disappeared, or been absorbed into large conglomerates, losing their identities along the way. Moss Motors is all about continuity. We take great pride in the long term commitment of our staff. Among senior management, over half started in the Moss warehouse, or in sales. We were drawn to Moss as car enthusiasts wanting a job in the industry, and have stayed on and worked to share our love of unique transportation.

We try, before you buy. The Moss R&D shop spends considerable time test fitting products, and reading included instructions. In many instances, we'll go back and ask the vendor for improvements to the product, or add our own fitment instructions. Over time, we've developed a good feel for which vendors make quality products, and which ones do not. It's hard to be perfect 100 percent of the time, but that's the target.

The products we offer here and on the web, we hope, will help you achieve your desired level of personalization and function. After all, if we all wanted black cars, we'd still be driving Model Ts. I don't know about you, but I'll bet your perfect ride looks different from mine. We hope these products help you get the job done.

Happy Motoring,
Robert Goldman
Vice President
Moss Motors, Ltd.

YOUR #1 SOURCE FOR JAGUAR ACCESSORIES

WE DELIVER...

Restoration and maintenance of classic British cars can be a challenge. Moss Motors is there beside you all the way because at Moss Motors we know the cars and we know the products.
To keep quality parts flowing, we rely on the following:

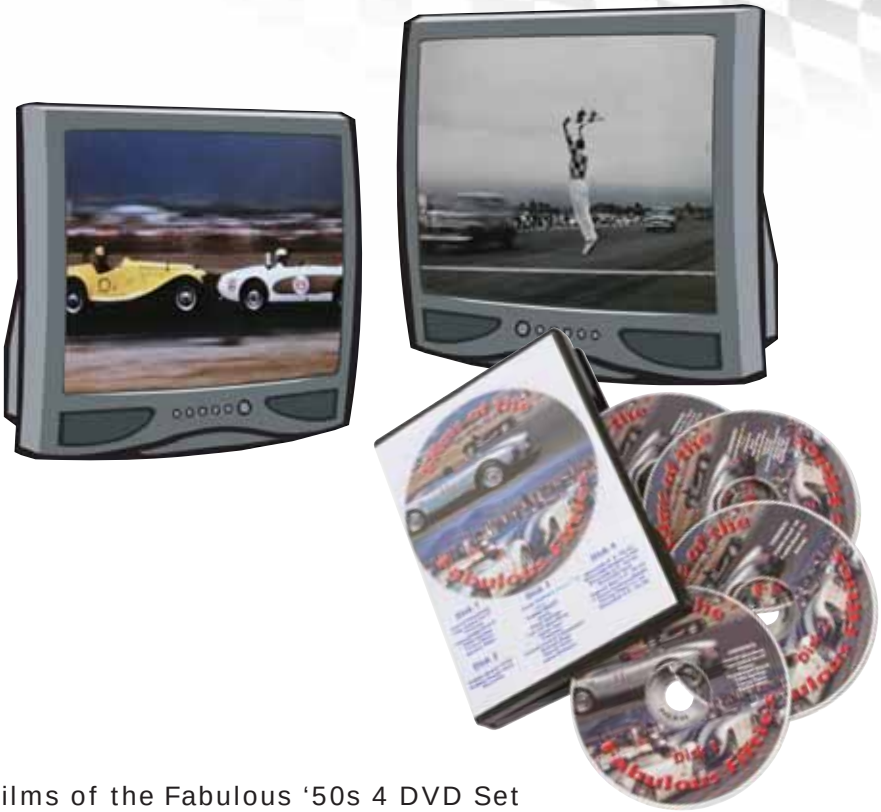
- Factory drawings where available
- SolidWorks engineering drawings of new, old stock parts
- Access to new and used original samples
- In house manufacturing and prototyping
- Original design and engineering specifications
- Installation and road testing
- Customer feedback
- Problem resolution and product updates
- Constant communication with suppliers and manufacturers

Often when a manufacturer supercedes a product, we have to go back and get earlier samples to ensure that our customers are aware of the difference. Here is a shot of a new Jaguar EFI fuel pump.

And here is a shot of a used original example. Note the differences in size.

Many parts supplied to us continue to change specification even though they have been on the market for many years. This photo was taken to identify the new non-polarised SU fuel pumps that are now on the market.

Our photo archives come in handy if the manufacturer changes any specifications. This shot of the E-Type A1113 alternator gives a good view of what the terminals are supposed to look like.



Films of the Fabulous '50s 4 DVD Set

This is a 4 DVD set of film and stills covering the beginnings of Sports Car Racing in Southern California from the personal collection of Al Moss. This treasure trove of material features early color footage of the races that formed the basis of the West Coast Sports Car phenomenon. Santa Barbara Airport, Riverside, Torrey Pines, and Paramount Ranch are all here in detail with hay bales bouncing as Allards, Porsches, TRs, MGs and Ferraris careen around the tracks on skinny tires. Learn the meaning of true vintage racing when many of the tracks were more dirt than asphalt and blood, sweat and high test were the formula for success.

Tops and Tonneau Covers

We carry a range of Robbins crush-grain vinyl and Sun-Fast cloth tops and tonneaus. Sun-Fast is manufactured for Robbins using a 100% acrylic Glen Raven surface cloth laminated with a superior rubber formulation to a pre-shrunk cotton backing cloth. Robbins Sun-Fast is engineered to be soft and supple to make installation of tops easier, and with tightly controlled strength characteristics to insure that tops do not sag, billow or lose their shape over time. Tops and tonneaus ordered in Sun-Fast Cloth will offer a rich appearance and many years of service if cared for properly. The necessary fasteners are included but not installed. XK120 and 140 tops are supplied with either heat-welded plastic windows or solid zippered window panels which allow installation of the original windows and frames. Our XK120 tops are the later style, mounting approximately twelve inches behind the tonneau rail. The early style XK120 tops that mount seven inches behind the tonneau rail are not currently available.

Jaguar Wire Wheels by Dunlop

We are now marketing the entire line of MWS Dunlop Wire Wheels for Jaguar. Original Fitment and Popular Oversize wheels are in stock, and we can order Competition and Stainless Steel wheels to be delivered within 6-8 weeks.

Hub Styles

Dunlop 15" wheels are available in two different hub configurations: "Curly Hub" and "Easy Clean." The stamped-steel Curly Hub was originally fitted up to July 1968, when it was replaced by the forged "Easy Clean" hub. The stamped Curly Hub is unique to Dunlop and offers a more classic, interesting appearance. As the "Easy Clean" name implies, this style of hub forging is easier to polish and gives the wheel a smooth, more modern look.

Curly Hub

Note the shadows on the center hub created by the convoluted stamping.

Easy Clean Hub

Note the smooth surface of the forging, giving the wheel a plainer look.

Painted Vs. Chrome

Most Jaguars were originally fitted with painted wire wheels. Chrome wheels were a popular option, but the stove-enameled look may be what you want to set your car apart on the show field. Painted wire wheels were used on all competition cars, and they can add a more correct, purposeful look for vintage race cars and other high-performance machines.

Rim Widths and Tire Considerations

Original 6-cylinder E-Types and Saloons had a 5"-wide rim with a 21.0mm inset, and later cars were fitted with 185HR15 tires. This combination gave the car a vintage look and feel, which many owners still find timeless. The original wheel and tire combination offer a lightness in steering and suspension that can be lost with wider wheels and tires.

For those interested in modernizing the car or re-creating competition options, Dunlop offers wheels up to 6.5" wide. These wider wheels will accept the generally available 205/70R15 tire, which was stock on the V12 E-Type. The combination of 6" or 6.5" wheel and wider tire fills out the wheel wells of the E-Type and gives its lovely body shape a stronger look—more along the lines of today's mega-rubber fashion. Care must be taken to ensure tire clearance with the wider wheels. In most E-Type applications, the rear bump stops may have to be removed for wider-tire clearance; this is simple to do and does not affect safety.

Corrosion Resistance

Dunlop painted wire wheels have very high corrosion resistance. Before being painted, they are primer-coated using Cathodic Electrophoretic Technology, popularly known as "electro" or "e-coat." The silver-grey paint topcoat combines with the primer to give the wheel a salt-spray resistance of 840 hours when tested per ASTM standards. Painted wheels have a one-year cosmetic and two-year structural warranty.

Each chrome Dunlop wire wheel has a rim and shell which are polished in special-purpose machines, then hand-polished by skilled craftsmen. To enhance the corrosion resistance, microporous nickel plating is done prior to chrome-plating. The product conforms to the stringent International Standards ISO 1456-1988 specifications. The spokes and nipples are chrome-plated stainless steel for brightness and long life. Chrome wheels have a two-year cosmetic and three-year structural warranty.

For the ultimate in corrosion protection, Dunlop offers a new line of Stainless Steel wheels, which also features a tubeless design. The all-stainless construction makes rusty and pitted chrome a thing of the past. These special-order wheels have a two-year cosmetic and three-year structural warranty.

Spoke Lacing
Inner & Outer Design

Original Jaguar wheels used an Inner-and-Outer Lacing design where the spokes connect to the inner and outer rims of the wheel. This gives the wheel strength, and this is the best lacing design for originality and road use. The disadvantage is the difficulty in keeping the rim clean where the spokes connect.

Series I E-Type, MKII

Stainless	854-426	661.95 FREE

Spoke Lacing
Center Laced Spoke Design

Center Laced wheels have their spokes connecting the hub to the center rib of the wheel only. This gives the outer rim a clean appearance and is very attractive. This type of wheel typically has a greater offset due to the lacing design, which brings the tire closer to the outer fender lip. Center-laced wheels often appeal to Jaguar owners who are more interested in giving their cars a custom look than in concours-correct original-equipment appearance.

Chrome	854-300	$333.95
Stainless	854-301	545.95

Spoke Lacing
Triple Laced Spoke Design

Triple Laced wheels are very strong and are suitable for extreme performance use. As the name implies, the spokes go to inner and outer rims and also to the center rib. This type of lacing is suitable for vintage racing use and also adds the competition look to a hard-driven street car.

Wire Wheels for Earlier Jaguars

Common practice for XK owners has been to forego their original 16" wheels in favor of 15" wheels to allow a wider range of tires choices. However, Dunlop now offers alternatives to the standard 16" wire wheels. Two versions are available: a 6"-wide wheel with 72 inner-and-outer laced spokes and a 6"-wide wheel with 60 outer laced spokes (which closely resembles the original competition offering).

Knockoffs: Winged or Safety?

Two-winged knockoffs were standard on wire-wheeled Jaguars until 1968. At that point, U.S. legislation mandated octagonal-style "safety" knockoffs. Those who own the newer cars and want to keep them original will want to retain the safety knockoffs. However, this design change was forced by bureaucrats rather than an improvement on the part of the Jaguar Car Company. Returning the car to its original intended design and look in conjunction with new wire wheels can be part of an overall refurbishment of the vehicle. Winged knockoffs bring back the original look and charm of these cars at no more cost than replacing damaged original safety knockoff nuts.

Jaguar 2-Eared Knockoffs

PRICES

All prices are subject to change without prior notice. Moss Motors reserves the right to correct any typographical errors.

SHIPPING

- Orders received by 3 p.m. local time are normally shipped the same day.
- We will ship by ground unless Air Delivery is specified.
- Alaska, Hawaii, Puerto Rico must use 2nd Day or Next Day Delivery only - add $6 to chart. (Delivery times not guaranteed.)
- Oversize Shipments – Shipments under $1,200 and over 130" length plus girth will be charged actual freight.
- Each shipment will reflect the appropriate shipping charges, including handling and insurance, listed on the chart below, dependent upon the parts value in each shipment.
- When ordering Direct Ship items and items that are stocked in our warehouse on the same order, only the total value of the stocked items in our warehouse is used to calculate your shipping charges from the chart. Direct Ship items will be invoiced to you separately at the Actual shipping charges from our Vendors.
- Orders shipped to California or New Jersey will be charged state sales tax.

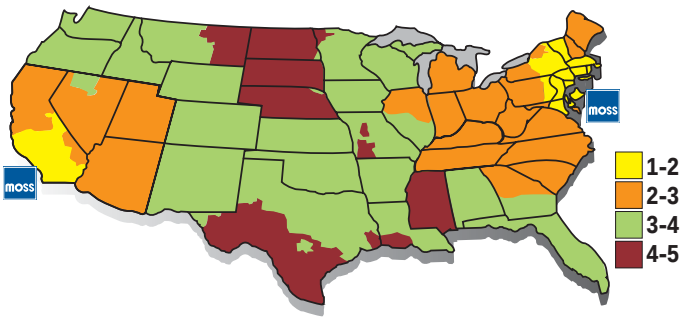
FOREIGN ORDERS (Includes Canada)

Foreign orders are charged actual shipping charges. Shipping quotes provided on request. All duties and taxes are the responsibility of the customer. Foreign orders must be paid with a credit card or check in US funds. There is a $10 charge to cover shipping and handling costs for catalogs shipped outside of the U.S. and Canada. One catalog per request.

PARCEL DELIVERY SERVICE

Follow these simple steps to figure your exact total...

1. Determine parts total and choose Ground or Air Service.
2. Figure your ground shipping and handling charges based on your parts total and area using the map and chart below.
3. CA and NJ residents add sales tax. You now have your combined order total.



Areas / Approximate Delivery Time (In Days)

- This map represents approximate working days for Ground Delivery. (As quoted by our carriers, not guaranteed.)
- It also assumes that we can ship from the nearest warehouse. Items shipped from the alternate warehouse will take longer.

WARRANTY

- 24 Month Warranty On all Classic British Parts. Longest Warranty in the Business.
- All Classic British products including superchargers, supercharger components and hardware are warranted to be free from defects in material and workmanship for 24 months from date of invoice.
- Moss Motors, Ltd. will, at its discretion, repair or replace any part that fails in service within the warranty period. This warranty does not cover labor, failure of related components, normal wear of brake or clutch components or failure resulting from alteration, misuse, accidental damage, faulty installation or faulty repair.
- Warranty requests should be submitted to our sales department and must be supported by the original Moss Motors purchase invoice and documentation of the failure.

RETURNS

- You may return new and uninstalled products in resalable condition for a full refund excluding shipping and handling charges for up to 6 months from date of invoice.
- Returns over 6 months, but less than 12 months will be charged a 10% restocking fee to cover our processing costs, in–house credit will be given on account usable on future orders. We reserve the right to charge up to 20% when no invoice is supplied and/or there is substantial work involved to process your return back to stock.
- Items over 12 months old are not returnable.
- Please remember to always inspect the parts upon receipt of your order to avoid any difficulties later on.
- To return a part follow the instructions printed on the back of the invoice.
- Make sure to package the products carefully to avoid damage during return and include all original packaging and a copy of the invoice. Ship to our California address.
- Refunds will not be issued for installed, damaged, incomplete, "Custom" or "Special Order" items.
- If a return is due to our error, we will reimburse reasonable freight charges. We will not reimburse additional charges for shipping/packaging services. Electrical items that have been installed are not returnable.

About This Catalog

This catalog covers parts for USA-specification left hand drive cars. In producing this catalog, our primary goal was to publish a listing of Jaguar parts which was as accurate and informative as possible for the USA market. In doing this, we have made every effort to correctly identify and include every part we stock likely to be needed to repair, restore or maintain your car. Although some of the parts listed are not currently available, our Product Development staff is constantly seeking new suppliers and manufacturers of quality reproductions of otherwise obsolete items. The current Moss Motors website (www.mossmotors.com) pricing is always the best indication of availability.

Local laws and regulations relating to pollution, safety and lighting equipment vary considerably from state to state and country to country. Since we distribute parts for these cars on a worldwide basis, we are not in a position to advise what laws are in effect in each locality. We strongly encourage anyone contemplating any modifications to a vehicle intended for street use, to check local regulations before proceeding. We strongly suggest that you save all old stock equipment should reinstallation be necessary at a future date.

NOTE: In the body of this catalog, items with indented descriptions are components of the non-indented kit or assembly above them.

Supersession and Rationalization of Parts

Most owners of British cars have, at one time or another, ordered an original "factory" part from an authorized dealer, only to find that the part received was different from the original, although it did work. This is the result of the supersession or rationalization of parts by the factory. Supersessions occur when a part is modified, and the original design or pattern is no longer produced. If old and new parts are interchangeable, even though they may appear slightly different, the old part is superceded by the new part. Rationalization is an attempt by the factory at efficiency in which one new part replaces several original parts, after which the original parts are no longer available.

WARNING!
Working on automobiles is inherently dangerous. Moss Motors, Ltd. is not liable for injury or damage due to incorrect installation or use of their products. All products are sold with the understanding that the safe and proper installation and use of the products is the customer's responsibility. Follow factory workshop manual procedures and instructions, but use current shop safety standards and common sense. Some tasks will require professional advice or services which Moss Motors cannot provide.

S.U. Carburetor Dashpot Oil

Finally take all the guesswork out of what type of oil to use in your dashpots. Specially formulated for all SU and Zenith-Stromberg carburetors, this oil ensures the correct piston movement so critical for correct fuel mixture and optimum performance. You don't have to use engine oil any more. 125ml. supply should last a long time.

Water Wetter

Water Wetter is a specially-formulated wetting agent which helps coolant "bond" to the metal surfaces inside your cooling system, thereby increasing heat transfer efficiency. Your car can run up to 15^0 F cooler. Highly recommended, especially for warmer climates. (Must be shipped ground - cannot ship by air.)

Wiring Harnesses

All of our wiring harnesses now feature original-style braided cloth binding over your choice of original laquer-braided or PVC-covered individual wires. Both types are color-coded to original specifications, and include required sub-harnesses. (Ignition wires, battery cables, headlamp pigtails and overdrive wiring are not included.)

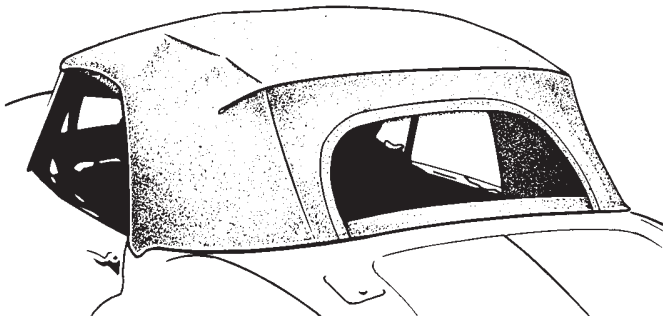
XK Tops / Tonneau Covers



Moss tops and tonneau covers are available in heavy crush-grain vinyl or Robbins "Sun-Fast"canvas. This unique solution-dyed acrilic canvas is extremely fade-resistant, stays soft and flexible under almost all conditions, and is highly resistant to sagging, billowing and shrinking. XK120 and 140 tops are supplied with either heat-welded plastic windows or solid zippered window panels which allow installation of original windows and frames.
Our XK120 tops are the later style, mounting approximately twelve inches behind the tonneau rail. The early style XK120 tops that mount about 7 inches behind the tonneau rail are not currently available.
